11	MeNetCare Srl	https://menetcare.com/	MeNetCare is an innovative startup with a multidisciplinary team developing digital health solutions to improve medication adherence and patient safety. Our mission is to provide integrated technologies that simplify medication management, support patients and caregivers, and contribute to reducing healthcare costs through greater therapeutic compliance. Our flagship product, MePill, is a connected automatic medication dispenser that enables the safe and programmed administration of medicines. The system combines hardware, software and cloud connectivity to ensure correct dosing, timely reminders, remote monitoring and traceability of therapy intake. By helping patients follow prescribed treatments accurately, MePill improves health outcomes, increases independence, and supports healthcare professionals and family members in the management of chronic therapies.	digital medicine, telemedicine, and IT systems	Our solution is designed for senior care providers, assisted living facilities, nursing homes, and elderly people living independently at home. It improves medication adherence through automated reminders and smart medication management. The system enables caregivers and healthcare professionals to remotely monitor patients and provides accurate records of which medications were taken, when they were taken, and whether any doses were missed. This helps improve patient safety, treatment effectiveness, and continuity of care.	Technology
